EDUCATION

Excel Engineering College, Tamil Nadu

Nov 2022 - May 2026

Degree (Bachelor of Engineering), Computer Science and Engineering

CGPA 7.51

S.S.M College Sasaram, Bihar July 2020 – Feb 2022 Intermediate in Science

Marks in percentage - 65%

PROFESSIONAL EXPERIENCE

DataPattern@AI | Remote

[19 June – 19 July]

Gen AI Intern

Tamil Nadu, India

- Collected research data by scraping the IEEE website using Selenium and Python
- Converted scraped data from CSV to Excel format for easier organization and analysis
- Ensured data accuracy and consistency while handling large sets of publication metadata
- Skills Gained: Selenium • Python • Web Scraping • Data Collection • CSV to Excel Conversion • Research Data Handling

LEADERSHIP & MENTORSHIP

Open Source Contribution | Excel Engineering College

[March 14']

- Trained 50+ students on Git workflows (branching, merging, rebasing) and GitHub collaboration (PRs, issues, project boards)
- Conducted hands-on workshops on CI/CD pipelines, demonstrating GitHub Actions for automated testing/deployment in open-source projects
- Guided contributors to resolve 50+ GitHub issues, improving their open-source participation.

Coding Club Lead | Excel Engineering College

[April 30']

- Led a campus coding club of 100+ members, organized workshops on DSA, web dev, and competitive programming

ACHIVEMENTS

- Solved 130+ problems on LeetCode and actively practiced coding on GeeksforGeeks, using Java, Python, and C++, strengthening core skills in Data Structures & Algorithms (DSA).
- Maintained a LeetCode contest rating above 1500, placing in the top 25% globally among 700,000+ users.

TECHNICAL SKILLS

Languages – Java , SpringBoot, Python(Basic), JavaScript (+React, Node.js)

Tool - Git, GitHub, Vercel, VS code, IntelliJ IDEA .

PROJECTS

Daily News Application

[June 25']

- Tech Stack: Java, Spring Boot, REST API, HTML/CSS, JavaScript, Bootstrap, MySQL, News API, Postman, Git & GitHub
- Developing a real-time Daily News web application using Spring Boot and REST APIs to fetch and display live news updates from multiple categories such as Technology, Business, and Sports.
- Implementing clean and responsive UI using HTML, CSS, Bootstrap, and JavaScript to ensure a user-friendly news reading experience across devices.
- Integrating third-party News API with robust backend architecture to enable category filtering, keyword-based search, and automatic news refresh features.

Job Portal Application

[May 25']

- Built a full-stack Job Portal using Spring Boot and React.js, with secure JWT authentication and dedicated dashboards for both job seekers and recruiters.
- Added features like job posting, resume uploads, and real-time filtering, making it easier for users to find relevant jobs quickly and efficiently.
- Connected everything with REST APIs, managed data using MySQL, and deployed the project through GitHub, demonstrating solid backend and frontend development skills.

Online Quiz Platform

[Mar - 25']

- Developed a responsive Online Quiz Platform using React.js and Node.js, enabling users to register, take timed quizzes, and receive instant feedback with score tracking.
- Implemented secure JWT-based authentication, dynamic question rendering by category, and leaderboard functionality using MongoDB for persistent data storage.

Med Assess - Healthcare Assessment | AI Powered

[Dec -24']

- Healthcare AI -powered platform designed to provide each medical information and resources from single platform
- Implemented features like disease assessments, AI-driven medical chatbots, a doctor appointment system, and access to government healthcare schemes, insurances like medical services and resources .

Task Management System

[Mar-25]

- Developed a Task Management System using Java and Spring Boot to handle task creation, updating, deletion, and retrieval.
- Integrated SQLite as a lightweight database using JDBC for efficient local data persistence.
- Applied core Java principles such as Object-Oriented Programming, exception handling, and collections (ArrayList, HashMap).
- Structured the application using layered architecture to improve code readability and maintainability.
- Automated project build and dependency management using Apache Maven.

CERTIFICATION

- Hacker Rank Python, Java | [Link](#)
- Udemy | Java Network Programming | [Link](#)
- Udemy | Learn Coding with Java from Scratch | [Link](#)
- Enterprise Data Science (IBM) | [Link](#)
- Career Essentials in Generative AI(LinkedIn Learning) | [Link](#)
- Cybersecurity Essentials | [Link](#)
